### 1.0 Introduction

The Council of Architecture (CoA) has been constituted by the Government of India under the provisions of the Architects Act, 1972. This Act was enacted by the Parliament of India and came into force with effect from 1st September, 1972. The Act provides for registration of Architects, standards of education, recognized qualifications and standards of professional conduct and etiquette to be complied with by the architects. The Council of Architecture is vested with the responsibility of maintaining the register of architects on national basis as well as regulating the Architecture education and practice of Architecture profession throughout India. For this purpose, the Government of India has framed Rules and Council has framed Regulations as provided for in the Architects Act, with the approval of Government of India.

Any person desirous of carrying on the profession as 'Architect' must have registration with Council of Architecture. For the purpose of registration, one must undergo the education in accordance with the Council of Architecture Minimum Standards of Architectural Education Regulations and possess the recognized qualification as appended to the Architects Act. The registration with Council of Architecture as an Architect entitles a person to use the title and style of Architect, for practicing the profession of architecture. If any person falsely represents or claims to be registered architect or uses any words or letters to suggest that she/he is an architect or misuses title and style of architect, such acts tantamount to committing of a criminal offence punishable under the Architects Act, 1972.

The practice of profession of an architect is regulated under the Architects (Professional Conduct) Regulations, 1989 (as amended in 2003), which prescribe the professional conduct, ethics and etiquette, conditions of engagement and scale of charges, architectural competition guidelines etc. Pursuant to these Regulations, the Council of Architecture has framed guidelines governing the various aspects of practice. There are about 465 institutions presently imparting architectural education in India leading to recognized qualifications. The standards of education being imparted in these institutions (constituent colleges/departments of universities, deemed universities, affiliated colleges/schools, IITs, NITs and autonomous institutions) are prescribed and monitored by Council of Architecture by way of Regulations and norms & standards prescribed from time to time, which set forth the requirement of eligibility for admission, course duration, standards of staff & accommodation, course content, examination etc.

These minimum standards as prescribed by the Council are required to be maintained by all the institutions. The CoA oversees the maintenance of the standards periodically by way of conducting inspections. The CoA is required to keep the Central Government informed of the standards being maintained by the institutions and is empowered to make recommendations to the Government of India with regard to recognition and/or de-recognition of a qualification. As per the Minimum Standards of Architectural Education Regulations,

qualifying in an aptitude test in Architecture is a mandatory requirement for admission to B.Arch. degree course. Hon'ble Madras High Court vide order dated 21.07.2003 in W.P.No.9707 of 2003, had upheld passing the aptitude test as a mandatory requirement.

### 2.0 About NATA 2020

National Aptitude Test in Architecture (NATA) is being conducted by COA since 2006, in terms of the provisions of CoA (Minimum Standards of Architectural Education) Regulations, 1983, published in the Gazette of India. It is implied that a separate aptitude test in Architecture should be conducted and such test should not be combined with the tests for admissions to Engineering, Pharmacy, Medicine and other disciplines. Being the competent authority for fixing the norms and standards for architectural institutions, COA has the necessary expertise to hold a Common Aptitude Test in Architecture, at national level to provide a single window system for appearing in aptitude test and to facilitate institutions, students and public at large for admission to First year of 5 year B.Arch. Degree Course at all recognized Institutions all over country. The purpose of conducting NATA is to provide a single scheme of examination for holding aptitude test and to facilitate prospective students all over the country to apply for admissions in architecture seats in institutions spread across the country and to avoid appearing in multiple aptitude tests. However, the actual admissions shall be carried out only by the concerned competent authorities of the respective states/institutions based on valid NATA score. The NATA also ensures that the eligibility criteria for admission to five-year Bachelor of Architecture (B.Arch.) degree course, as prescribed by CoA and duly approved by the Central Government, are strictly adhered to and followed all over the country in Architectural Institutions.

**In view of the prevalent situation arising out of Corona Virus Pandemic (COVID-19) and consequent directives of the Government of India for ensuring public health related social distancing and other measures, the Council of Architecture, has decided to conduct both Parts A (Cognitive skills for Drawing and Visual Composition Test) and B (Test on Scientific Ability & General Aptitude) of NATA as a comprehensive online aptitude test. The candidate has the option to appear for comprehensive online test of NATA 2020 either from their respective place of residence/stay or at the Council allotted centres in case they do not have internet connectivity or technical/ hardware resources such as laptop/PC, web cam/ microphone etc. The candidates will soon be provided an option in their respective login accounts to opt for their preference for place of examination for NATA 2020.**

**Part-A Test (Cognitive skills for Drawing and Visual Composition Test), due to exceptional circumstances, has been redevise as a preferential/multiple choice type test to be answered on PC/laptop. The syllabus for Part-A Drawing Test accordingly has been revised as Cognitive Skills for Drawing and Visual Composition Test and is specified in the brochure. This substitutes the Paper based test for this year.**

NATA measures the aptitude of the applicant for specific field of study, i.e. Architecture. The test makes an assessment of cognitive skills required for drawing and composition observation skills, sense of proportion, aesthetic sensitivity, Physics, Chemistry and Mathematics at 10+2 level and critical thinking ability that have been acquired by the candidate over the past few years and are related to the specific field of study.

NATA plays an important role in selecting candidates having necessary aptitude to become competent architects to serve the society and to build the nation in coming decades, especially in view of the Govt. of India mission of Smart Cities, Housing for All and Green and Energy efficient Buildings.

With the objective of attracting a greater number of bright aspirants for studying Architecture and practicing the same as a profession in future, Council like every year will be conducting NATA-2020 for admission to B.Arch. in the academic session 2020-2021. **NATA-2020 shall be conducted twice a year**, thus giving opportunity to those students who miss out the first test due to some reason or other or wish to improve upon their NATA score in the first test by re-appearing the second test. Both the first and second test will be conducted on different dates as **totally computer-based** examinations all over the country.

The test shall consist of two parts, both to be answered on a PC/Laptop – Part-A tests Cognitive skills required for drawing and visual composition and Part-B (Scientific ability and General Aptitude) comprises Multiple Choice Questions (MCQ) on Physics, Chemistry, Mathematics and general aptitude. This total computer-based examination has been devised for this year alone in view of the current COVID situation and to enable candidates to take the test preferably at their place of residence/ stay or by their choice at a Test center allotted by the Council.

### 3.0 Schedule of Examination

Examination shall be conducted in two sessions on the date of the first test and depending on the number of candidates registering for the second date of the test, it will be decided whether there will be one or two sessions.
